EDUCATION

Bharati Vidyapeeth College of Engineering, Navi Mumbai June 2024 – June 2028

Bachelor of Engineering in Computer Engineering | CGPA: 7.57/10

- **Relevant Coursework**: Data Structures & Algorithms (DSA), Database Management Systems (DBMS), and RESTful APIs.

EXPERIENCE

Codence Studio | *Frontend Developer Intern* July 2025 – Nov. 2025, Hybrid

- Developed **3 production ERP applications and 2 landing pages** using **Next.js** and **Tailwind CSS**.
- Built **reusable and modular components** using the team's internal frameworks, reducing feature development time.
- Improved **page loading speed by 30%** using **ISR and SSG**, and built responsive pages connected to **REST APIs and Redux**.

WeCodeCrunchers | *Technical Team Member* Jan. 2025 – Aug. 2026, Navi Mumbai

- Organized **2 hackathons and 3+ coding challenges** and mentored **30+ peers** through code reviews and full-stack development sessions.

PROJECTS

FIT KAKA – AI WhatsApp Nutrition Tracker **Link** **Demo** **GitHub**

Next.js, Node.js, MongoDB, Gemini SDK, WhatsApp Cloud API, TypeScript

- Built a WhatsApp-based nutrition tracker using the **WhatsApp Cloud API** and **Gemini SDK** to analyze food messages and images.
- Developed **Node.js/Express** APIs to receive WhatsApp messages, process nutrition-related requests, and store meal data in **MongoDB**.
- Built a **Next.js dashboard** for users to view meal history, calorie intake, health profiles, BMI, and download their health records.

TestimonialsLo – Testimonials Management Platform **Link** **GitHub**

Next.js, Node.js, Express.js, PostgreSQL, Prisma, Mux SDK, Razorpay SDK, NextAuth

- Built a **full-stack testimonial platform** using **Next.js, Express.js, PostgreSQL, and Prisma** with user authentication and video testimonials.
- Integrated **Mux** for video processing and **Razorpay** for payments, handling uploads and payment flows through backend APIs.
- Designed relational database models using **Prisma and PostgreSQL** for users, testimonials, and application data.

AI Interviewer – Personalized Voice Interview Platform **Link** **GitHub**

React, Bun, TypeScript, WebSockets, Deepgram, ElevenLabs, OpenRouter, Drizzle ORM, PostgreSQL, Tailwind CSS

- Built an AI technical interviewer using OpenRouter to generate personalized interview questions and evaluations based on candidate's **resume, GitHub, LinkedIn, role, and difficulty**.
- Implemented real-time voice interaction using **WebSockets, Deepgram streaming STT, and ElevenLabs TTS**, with automatic answer submission after silence.
- Developed a **Bun/TypeScript** backend with **Express, Drizzle ORM, and PostgreSQL** to store interview sessions, questions, answers, and feedback.

ACHIEVEMENTS

Hackathon Achievements & Participation 2025

- Participated in **4 hackathons** and collaborated with teams to build software solutions; **Won BV Hacks 1.0** among 30 participating teams.

SKILLS

Languages: Java, TypeScript, JavaScript, SQL, HTML

Frameworks & Databases: React.js, Next.js, Turborepo, Node.js, Express.js, Prisma ORM, Drizzle ORM, PostgreSQL, MongoDB, Tailwind CSS

Tools & Cloud: Docker, AWS (EC2, S3, ASG), VS Code, Figma, Git, GitHub
